

# AlphaTec® 58-270

Chemical resistant glove with industry-leading grip and superior dexterity

Category III

Ansell introduces a new glove in the AlphaTec® range for light to medium chemical applications. The AlphaTec® 58-270 glove benefits from the same industry-leading grip with an enhanced dexterity and comfort.

## Recommended Usage

Light and medium duty applications requiring dexterity and chemical resistance against oils and greases in the following industries:

- Automotive & OEM
- Oil & chemical
- Metal
- Machinery & equipment
- Building & construction

## Superior dexterity

The thin, double-wall nitrile shell and 15-gauge seamless nylon liner offer users excellent tactility and flexibility. In addition, the glove's lightness results in better comfort than any chemical-resistant glove. Easy to don and remove, The AlphaTec® 58-270 glove retains minimal heat, reducing perspiration compared to other chemical gloves.

## Industry leading grip

Wherever chemicals, oil and grease are present, AlphaTec® gloves provide the best grip thanks to the Ansell Grip Technology™. This improved

grip reduces fatigue and gives wearers confidence, control and comfort, allowing them to handle slippery objects safely.

## Chemical protection

The AlphaTec® 58-270 glove is a liquid-proof glove. The safety cuff shape is designed to prevent snagging, avoid itching on bare hands and ease size identification with color over-edge. Wearers keep their hands clean and their skin protected from harmful contact with oils, chemicals and other liquids.

## Longer life

AlphaTec® can be used across a broad range of oily or dirty activities, allowing multitasking and therefore improved productivity: wearers don't lose time changing gloves. Because oil doesn't penetrate or degrade the coating, AlphaTec® 58-270 lasts longer, reducing costs.

## Featured Technology

Ansell Grip Technology™

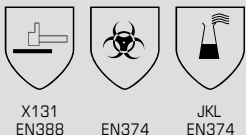

## Packaging

12 pairs in a bag; 12 bags in a carton

## Specifications

Style	Liner material	Cuff style	Grip design	Colour	Size	Length
58-270	Nylon	Knitwrist	Textured	Black and grey	7, 8, 9, 10, 11	300 mm
