

# Vantage® proFood®

Premium cut protection and cold insulation through advanced technology

Intermediate Design

## Washable, cold-insulated, cut-resistant glove

Looking for maximum cut protection and relief for cold, stiff hands? Ansell Vantage® proFood® gloves are the first to provide cut resistance up to Cut Level 5 combined with excellent insulation against temperatures down to 0° C. The result? An optimum hand protection solution for food preparation applications, offering increased safety, a higher level of user comfort and enhanced productivity.

## Recommended Usage

- Boning
- Carving
- Slicing and dicing
- Fish filleting
- Fruit and vegetable processing
- Meals preparation

## Outstanding cut protection

Reserved exclusively for our premium gloves, Ansell's cut resistance technology uses revolutionary engineered yarns containing Dyneema® fibre, for the highest cut-protection-to-weight ratio available. Rated at Cut Level 5, Vantage® proFood® gloves offer ideal protection when working with sharp knives, increasing worker safety.

## Superior cold insulation

The cool temperatures of hygienic food preparation can be

both unpleasant and unhealthy for workers. Instead of common yarns, Vantage® proFood® gloves are manufactured with engineered yarns for better insulation and superb protection down to 0° C.

## Excellent comfort and grip for higher productivity

The Vantage® proFood® glove is designed to fit the hand well and comfortably. The glove also provides a better grip in wet and fatty conditions, enhancing both productivity and safety.

## Cost-effective: no shrinkage after hightemperature laundering

Vantage® proFood® gloves are a smart investment. Fully washable, they retain their shape and size after repeated laundering. During manufacture, Vantage® proFood® gloves undergo pre-

washing at 90°C. As a result, they may be laundered at temperatures up to 90°C with no further shrinkage.

## Compliant with EU food legislation

Ansell Vantage® proFood® gloves fully comply with the relevant European Union Food-Contact Regulations and with applicable national legislations. For example, conforming to hygienic regulations, Vantage® proFood® gloves do not have an attached label.

## Standardised colourcoding for overedging

For easy identification, the Vantage® proFood® glove sizes are indicated by the colour of the cuff overedging.

## Packaging

6 pieces per reusable, zippered polybag. 72 pieces per carton

## Specifications

Ref		Size
